Scanner Test Sheet — Parts Inventory Tracker

Print at "Actual size" (100%). Open Notepad, then scan each barcode below.

1. Code 128 — large

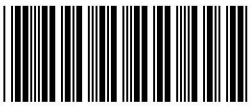

2. Code 128 — same size as your labels

3. Code 128 — small

4. Code 39 — a different barcode type

What your results mean:

- Each scan shows its text in Notepad → scanner is working. The app handles the rest.
- No beep on ANY barcode → the scanner is off or disabled in Panasonic's barcode settings utility.
- Test 4 beeps but tests 1–3 don't → "Code 128" is turned off in the scanner settings. Turn it on.
- Beeps, but nothing appears in Notepad → set the scanner's output to "keyboard" / "keystroke" mode.
- Test 1 works but 2–3 don't → the sheet was printed scaled down. Reprint at Actual size.
